

SCHOOL DISTRICT WEB PAGE

The Internet provides a valuable learning tool for students and staff and offers another communications vehicle for informing the public about school information, programs and activities. The board authorizes the establishment of a school district web page. Only those web pages approved by authorized technology personnel and maintained in accordance with board policy and administrative procedures will be recognized as official representations of the school district.

Do Not Post Identifying Information

- Do NOT publish students' last names; a first name and last initial is appropriate.
- Do NOT publish phone numbers, addresses, birth dates, or social security numbers of students or staff members

Disclaimers

- It is standard procedure for a publisher to issue a disclaimer whenever individuals may be expressing personal opinions and not those of the school or the school district.

Committee Approval

- All web pages must be approved by the authorized technology personnel prior to being published on the district web page.

The superintendent, in conjunction with the technology committee, will develop administrative procedures regarding the web site.
